MeetingQuality
Meetings With Meaning

Project Success Family – Overview

MeetingQuality's Project Success Family is a suite of leading-edge productivity/efficiency procedures and Software as a Service (SaaS) that helps organizations predict project outcomes by highlighting opportunities for timely problem identification, early course correction and significant cost savings.

What does MeetingQuality do?

MeetingQuality is based on the principle that projects are more likely to succeed when key evaluation questions are asked throughout the life-cycle – as opposed to during post-mortems where we often ask: **What went wrong?**

MeetingQuality's continuous assessments provide answers to questions (like these below) in real-time:

- What is going well?
- What needs to be improved?
- What course corrections should be made?
- What are people really saying?
- How are people working together?

How does MeetingQuality work?

MeetingQuality provides simple and consistent procedures and software for working groups, project teams, steering committees, stakeholder groups and executive committees. These entities use the procedures and software to evaluate project progress, to assess the health of interpersonal and team relationships and to achieve balances between operational, financial and strategic goals, customer constraints, external factors and the management of risk. MeetingQuality Consulting Partners provide management advisory services by interpreting the results and turning them into real-world solutions.

Agile Portfolio Report						
Project	Backlog		Demo		Retro	
	MQS	PSP	MQS	PSP	MQS	PSP
Agile Project A	50%	84%	66%	92%	69%	82%
Agile Project B	-	-	56%	55%	59%	61%
Agile Project C	-	-	66%	74%	63%	64%

Waterfall Portfolio Report						
Project	Steering Committee		Project Team		Stakeholders	
	MQS	PSP	MQS	PSP	MQS	PSP
Waterfall Project A	68%	75%	73%	56%	65%	71%
Waterfall Project B	54%	80%	35%	40%	59%	25%
Waterfall Project C	80%	74%	68%	76%	73%	78%

Small Footprint – Low Overhead

High Impact – High Return
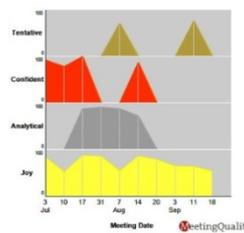

What kinds of overhead does MeetingQuality require?

MeetingQuality makes only a very small footprint in organizational activities, while it delivers critical metrics and reports that provide instant insight into portfolio management, project governance and strategies required for project success.
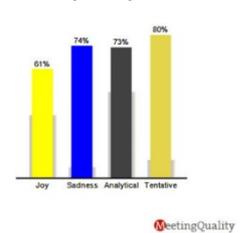

What techniques does MeetingQuality use?

MeetingQuality collects project performance and human-factor information then uses proprietary algorithms, Social Network Analysis techniques and Artificial Intelligence (IBM Watson) to aggregate this information into metrics and reports that predict project progress and success over time.

**Artificial Intelligence (IBM Watson)**

Emotions/Sentiments Detected Over Time

**Emotion/Sentiment Strength and Frequency Distribution**

What are some by-product benefits of using MeetingQuality?

Meeting Promotor Score (MPS) Network Map

Gender-Based Rating Differences (MPS)

MeetingQuality is a pragmatic method to discover ways to improve alignment between an organization's formal and informal leadership and its formal and informal structures. MeetingQuality demonstrates the linkage between the quality of interpersonal relationships and performance and highlights how gender may have an effect on peer assessments.

Align Project Performance with Organizational Vision and Goals!
